

5102/9102 Self Aligning Mounts

DESCRIPTION:

The 5/9102 self aligning silo mount, combined with the 5/9102 load cell family, provides high accuracy weighing assemblies suitable for process control, batch weighing, silo / hopper and belt scale applications.

The 5/9102 foot assembly is an ideal solution for medium capacity belt, pallet and platform scales.

The 5/9102 mount and foot are based on a rocker pin design, combining excellent load introduction to the transducer with an overall low profile. Hardened components are used at all load bearing surfaces. The stainless steel construction guarantees long term reliability, even in the most harsh of environments.

FEATURES:

- Hardened components at all bearing surfaces
- Rocker pin load introduction
- Stainless steel or nickel plated steel versions available
- Built in horizontal movement control and lift-off protection
- Load cell (re)placement after installation of the mount
- Optional stay rod assembly
- **Capacities:**
 - 200 → 2500lbs (9102)
 - 50 → 2500lbs (5102)

Self Aligning Mount

The 5/9102 mount permits controlled horizontal movement in all directions. The design allows the load cell to be (re)placed after installation of the mount. The critical load introduction area is mechanically protected.

Stay Rod Assembly

If major load movement is anticipated stay rods should be used to restrain a platform or vessel. The 5/9102 stay rod assembly can be bolted to the mount prior to or after its installation.

Height Adjustable Foot

The stainless steel foot, which has 5mm height adjustment, provides excellent load introduction to the transducer. The foot allows flexibility in platform design without compromising overall system performance.
